

KAY9372HD Digital Capture

The universal solution for all ENT & Speech Pathology applications

The universal solution

Versatile

The KAY9372HD is a customizable digital capture module that was designed to support all ENT and Speech Pathology applications including HD Stroboscopy, HD FEES, HD Videofluoroscopy, and HD Endoscopy.

Advanced

The KAY9372HD provides superior HD image quality. When combined with the best-in-class stroboscopic light source, videoscopes, video processors, and feature-rich software tools that were developed alongside physicians

and speech pathologists, the KAY9372HD Digital Capture supports all diagnosis, reporting & research applications necessary to document precise clinical changes.

Efficient

Full networking solutions are available for the KAY9372HD Digital Capture to improve workflow and reduce documentation errors. These include endoServer™, endoPortal, HL7 for report integration into hospital EHR systems, and DICOM to send exams directly to PACS.

KEY FEATURES

- HD digital video recording & HD output
- Record FEES, MBS/VFSS, Stroboscopy & Endoscopy
- Record VFSS at 30 frames per second (ASHA recommended)
- Still-capture during live exams
- 180-degree image rotation
- Powerful software including montage, side-by-side image display, slow-motion and frame-by-frame viewing
- Customizable application menus & report writing tools
- Built-in patient database with data migration
- Full networking capability, including endoPortal & endoServer™
- Send reports directly to hospital EHR via HL7
- Send exams straight to PACS via DICOM
- Compatible with the KAY 9400 Laryngeal Strobe
